EXPERIENCE

Associate Project Engineer

April 2025 – Present

AspenTech Digital Grid Management

Minneapolis, MN

- Led advanced SCADA system design and deployment for numerous electric utilities in Alaska, Indiana, North Dakota, Tennessee, Texas, and Washington
- Supported implementation of OSI monarch software across NERC-CIP compliant generation, transmission, and distribution utilities serving >2 million residential, commercial, and industrial customers
- Created system architecture diagrams and other technical documents to communicate process data flows, firewall connectivity, and security requirements for Windows and Linux-based servers
- Triaged critical customer system issues, maintaining <15 minute response time and keeping total issue resolution time to under 4 hours
- Modernized new-hire training curriculum and facilitated the training of 80% of new hires across various engineering teams

Computer Science Teaching Assistant

September 2023 – May 2024

Middlebury College

Middlebury, VT

- Led biweekly tutoring sessions to 20+ introductory CS students and debugged student Python code (Fall 2023)
- Helped students understand the fundamentals of computer architecture and C programming (Spring 2024)

ITS Lead Computer Consultant

February 2021 – May 2024

Middlebury College

Middlebury, VT

- Supervised team of 14 employees providing IT support to over 5000 student, faculty and staff across Middlebury's undergraduate, graduate, and international campuses
- Resolved issues with classroom media, device network connectivity, and Active Directory accounts while escalating to other teams within broader IT infrastructure as needed
- Managed schedules and supervised work of less experienced employees, providing mentorship and support as employees built confidence in their ability to support customers

Instrument Control and Automation Intern

June – August 2023

National Renewable Energy Laboratory

Golden, CO

- Developed automated monitoring and control software in Python for custom-built laboratory equipment, improving safety and reducing user input by 90%
- Collaborated on the creation of a comprehensive general-purpose data acquisition program, integrating open-source sensors and microcontrollers into Raspberry Pi-compatible GUI application

EDUCATION

Middlebury College

September 2020 – May 2024

Bachelor of Arts in Computer Science and Physics

Middlebury, VT

- GPA: 3.80/4.00 | Summa Cum Laude, Honors in CS
- Relevant Coursework: Systems Programming, Operating Systems, Computer Architecture, Software Development, Algorithms, Data Structures, Electronics for Scientists, Experimental Physics, Intermediate Electromagnetism

LEADERSHIP

Men's Team Co-Captain

September 2023 – May 2024

Middlebury College Men's Club Crew Team

Middlebury, VT

- Organized team practices daily as well as managing equipment maintenance, transportation and other general operations for team of over 60 athletes

TECHNICAL SKILLS

C, Python, Linux, MongoDB, PostgreSQL, MSSQL, Raspberry Pi, Arduino, Soldering, Electronics debugging, Oscilloscopes, Circuit design, ARM assembly, MATLAB, Make, Git
